EXPLANATORY NOTES

1. Source of Data. Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.

2. Valuation. The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. If effect, therefore, export values are taken f.o.b. point of shipment for export.

3. Units of Quantity. The various units of quantity used in Canadian export statistics are listed in "Abbreviations and Units of Quantity".

Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the unit of quantity refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. Coverage. Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

5. Exclusions. Export totals exclude certain special and non-commercial transactions, such as gold (where the value of the gold content is 80% or more of the value of the commodity) and current coin, goods shipped to Canadian armed forces or diplomats stationed abroad, settlers' effects, private donations and gifts, identifiable tourist purchases, temporary shipments of goods for exhibition or competition, and photographic film shipped without sale. While excluded from the export totals, these transactions are recorded in the Trade of Canada reports (see "Changes in Coverage of Commodity Statistics", on page 7). Other exclusions from export totals, which are not recorded in the published statistics, are goods exported to other N.A.T.O. countries and financed under the Defence Appropriation Act, goods temporarily exported for testing, repair or installation of equipment, and materials and supplies for the use of international carriers, such as fuel and stores sold to foreign vessels, aircraft and other vehicles in Canada.

6. Countries Credited. Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.

NOTES EXPLICATIVES

1. Source des données. La statistique des exportations se fonde sur les déclarations des exportateurs (documents d'exportation) subséquemment vérifiées par les fonctionnaires des douanes, sauf dans le cas de l'énergie électrique dont la statistique se fonde sur les rapports reçus de l'Office national de l'énergie.

2. Évaluation. La valeur des marchandises exportées est le montant réel, en dollars canadiens, reçu par l'exportateur, sans les frais de transport, d'assurances et de manutention. La valeur des exportations est donc établie f.a.b., point d'expédition.

3. Unités de quantité. Les diverses unités de quantité utilisées par la statistique canadienne des exportations sont énumérées dans "Abréviations et unités de quantité".

Le poids, s'il est indiqué, est le poids net des marchandises, à l'exclusion de celui de l'emballage nécessité par l'expédition.

Le présent rapport comprend des classements statistiques tels que "tondeuses à gazon et pièces", qui indiquent une quantité par un "nombre", ainsi qu'une valeur. Dans ces classements, l'unité de quantité représente uniquement le nombre d'articles exportés dans un état assez complet, tandis que la valeur comprend aussi la valeur de toutes les pièces de la marchandise exportée. Dans ces cas, il est impossible d'établir la valeur unitaire moyenne.

4. Couverture. La statistique des "exportations nationales" (appelées aussi "exportations de produits canadiens") comprend les marchandises entièrement produites ou fabriquées au Canada de même que celles qui figuraient autrefois aux importations, et dont la forme a changé et la valeur, augmenté par la fabrication et qui sont ensuite exportées. La statistique des "réexportations" (appelées aussi "exportations de produits étrangers") ne comprend que les marchandises qui figuraient autrefois dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées.

5. Exclusions. Les chiffres des exportations ne comprennent pas certaines transactions spéciales et non commerciales, comme l'or (lorsque la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur de l'article) et la monnaie courante, les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger, les effets des immigrants, les dons et cadeaux privés, les achats identifiables des touristes, les expéditions temporaires de marchandises aux expositions ou concours, et les films photographiques expédiés sans être vendus. Bien qu'elles soient exclues des chiffres des exportations, ces transactions paraissent dans les rapports intitulés Commerce du Canada (voir "Modifications apportées à la couverture statistique des marchandises", page 7). Sont aussi exclues de ces chiffres et ne paraissent pas dans la statistique publiée, les marchandises exportées aux autres pays de l'OTAN et financées sous le régime de la loi des subsides pour la défense, celles qui ont été exportées en vue d'essais, de réparations ou de l'installation de matériel, et les matières et fournitures destinées aux transporteurs internationaux, comme le mazout et les approvisionnements vendus aux navires, avions et autres véhicules étrangers au Canada.

6. Pays de destination. Les exportations sont attribuées aux pays auxquels elles sont expédiées au moment où elles quittent le Canada. Le pays de destination est celui vers lequel les marchandises sont acheminées sans interruption de transport, sauf dans le cas d'un transbordement d'un moyen de transport à un autre.

CHANGES IN COVERAGE OF COMMODITY STATISTICS

Effective January 1960, a new category of export and import transactions has been established under the heading of "Special Transactions—Non-Trade." These transactions are excluded from the trade totals, but are published for the convenience of users of this information. The statistical classes contained in this category are as follows:

New class No.	Description or class reading	Former treatment	
		Exports	Imports
9005-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada.....	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition.....	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

Prior to 1960, all the statistical classes listed in the Trade of Canada reports were included in the trade totals. Of those statistical classes which since 1960 have been published as "Special Transactions—Non-Trade", settlers' effects and private donations and gifts were prior to 1960 included in the trade totals. Movements of goods for Canadian armed forces and diplomats abroad were excluded from the export totals but movements of goods for foreign armed forces or diplomats in Canada were largely included in the import totals.

Tourist purchases in Canada were recorded in the appropriate export commodity classes and duty-exempt Canadian tourists' purchases abroad were recorded in a separate import class, both types of transactions being included in the trade totals. But while all duty-exempt Canadian tourists' purchases abroad were recorded, the coverage of tourist purchases in Canada was limited to those transactions for which customs export entries are normally required (mail and express). Photographic film exported or imported without sale was only partly included in the trade totals. Exports and imports of gold and current coin, and temporary movements of goods for exhibition or competition, have been for a period of years prior to 1960 excluded from the trade totals.

Thus, prior to 1960 the published totals included various commodity movements which either have no international financial implications or, for various reasons, are better con-

MODIFICATIONS APPORTÉES À LA COUVERTURE STATISTIQUE DES MARCHANDISES

A compter de janvier 1960, une nouvelle catégorie de transactions d'exportation et d'importation a été établie: "Transactions spéciales—non commerciales". Ces transactions sont exclues des totaux du commerce, mais sont publiées pour accommoder ceux qui s'y intéressent. Les groupements statistiques de cette catégorie sont les suivants:

N° de la nouvelle classe	Description ou interprétation de la classe	Traitement antérieur	
		Exportations	Importations
9905-9965	Or et monnaie courante	exclus	exclus
9980	Mouvements de marchandises destinées aux forces armées ou aux diplomates du Canada à l'étranger, ou aux forces armées ou aux diplomates étrangers au Canada	exclus	en grande partie inclus
9982	Effets des immigrants	inclus	inclus
9984	Dons et cadeaux privés	inclus	inclus
9986	Achats des touristes	partiellement inclus	inclus
9988	Mouvements de marchandises à destination des expositions et des concours ..	exclus	exclus
9990-9992	Mouvement de films photographiques en vue d'expositions ou de développement sans qu'il y ait vente	partiellement inclus	partiellement inclus

Jusqu'à 1960, tous les groupements statistiques énumérés dans les rapports intitulés Commerce du Canada étaient inclus dans les totaux du commerce. Parmi ces groupements qui, depuis 1960, ont paru dans "Transactions spéciales—non commerciales", les effets des immigrants et les dons et cadeaux privés étaient, avant 1960, compris dans les totaux du commerce. Les mouvements de marchandises destinées aux forces armées ou aux diplomates du Canada à l'étranger étaient exclus des totaux du commerce, mais ceux des marchandises destinées aux forces armées ou aux diplomates étrangers au Canada étaient en grande partie inclus dans les totaux des importations.

Les achats des touristes au Canada s'inscrivaient dans les classes appropriées de marchandises exportées et les achats en franchise des touristes canadiens s'inscrivaient dans une classe d'importations distincte, les deux formes de transactions étant incluses dans les totaux du commerce. Mais alors que tous les achats en franchise des Canadiens à l'étranger étaient inscrits, la couverture des achats des touristes au Canada se limitait aux transactions exigeant normalement des inscriptions des ports douaniers (poste et messagerie). Les films photographiques exportés ou importés sans être vendus n'étaient que partiellement inclus dans les totaux du commerce. Les exportations et importations d'or et de monnaie courante et les mouvements temporaires de marchandises destinées aux expositions et concours ont été, pendant quelques années avant 1960, exclues des totaux du commerce.

Ainsi, avant 1960, les totaux publiés comprenaient divers mouvements de marchandises qui n'ont aucune implication financière internationale ou qu'il faut mieux, pour diverses

sidered separately from merchandise trade in economic analysis. Furthermore, some of these transactions did not receive uniform treatment in export and import statistics. Especially in the last ten years, there have been sizable differences between the balance of trade calculated from unadjusted export and import statistics and that calculated from data adjusted to exclude special and non-commercial transactions.

This volume contains the figures relating to all the statistical classes grouped as "Special Transactions—Non-Trade" for calendar year 1960. The 1959 and 1958 figures are available only for settlers' effects (old export class 9530) and private donations and gifts (old export class 9550).

raisons, séparer du commerce des marchandises pour l'analyse économique. De plus, la statistique des exportations et des importations n'a pas traité uniformément certaines de ces transactions. Il y eu, surtout durant la dernière décennie, des différences importantes entre la balance du commerce établie d'après la statistique non rectifiée des exportations et des importations et celle établie d'après des données rectifiées et excluant les transactions spéciales et non commerciales.

Le présent volume comprend les chiffres relatifs à toutes les classes statistiques groupées sous "Transactions spéciales—non commerciales" pour l'année civile 1960. Les chiffres de 1959 et 1958 ne sont disponibles que pour les effets des immigrants (ancienne classe d'exportation 9530) et les dons et cadeaux privés (ancienne classe d'exportation 9550).

**NEW COUNTRY CLASSIFICATION FOR
EXTERNAL TRADE STATISTICS**

Effective January 1960, a new country classification has been introduced for export and import trade statistics, based on a division of the world into geographical regions. Within each region the countries are listed in alphabetical order in two sub-groups, the first for Commonwealth countries, the second for other countries. For any country the area included coincides with the geographical area of the country unless otherwise stated; that is the area includes both the customs area of the country and also any free areas in which customs control may not be exercised. Countries with which Canada's trade is small are grouped with contiguous or related areas.

The order in which the various regions are arranged was determined by the convenience of listing the United Kingdom first when presenting statistics of commodities by countries, and the United States last, directly above the commodity totals. This arrangement is traditional in Canadian trade statistics, and has proven most useful in permitting ready reference to details of trade with Canada's two leading trading partners.

The new classification also incorporates a few changes in country designation without any change in territorial coverage as well as a number of changes in country coverage, including the deletion of some countries and the addition of others. The countries affected by these changes are asterisked in the classification of countries.

**NOUVELLE CLASSIFICATION DES PAYS POUR LA
STATISTIQUE DU COMMERCE EXTERIEUR**

A compter de janvier 1960, la statistique du commerce des exportations et des importations comprend une nouvelle classification des pays, fondée sur la division du monde en régions géographiques. Dans chaque région, les pays sont groupés en deux sous-groupes, celui des pays du Commonwealth et celui des autres pays. Pour tout pays, la région comprend la région géographique du pays à moins d'indication contraire; c'est-à-dire que la région comprend et la région douanière du pays et toutes régions libres où les règlements douaniers ne peuvent être appliqués. Les pays avec lesquels le commerce canadien est peu important sont groupés avec les régions avoisinantes ou similaires.

L'ordre dans lequel les diverses régions sont énumérées a été établi de façon à indiquer d'abord le Royaume-Uni dans la présentation de la statistique des marchandises selon les pays, et les États-Unis en dernier, directement au-dessus des totaux de marchandises. Cette disposition est traditionnelle dans la statistique du commerce canadien et s'est révélée très utile car elle permet de se référer rapidement aux données du commerce du Canada avec ses deux principaux partenaires commerciaux.

Le nouvelle classification apporte aussi quelques modifications aux noms des pays, sans en changer la couverture territoriale, ainsi que certains changements dans la couverture des pays, y compris l'addition de certains pays et le retrait de certains autres. Les pays visés par ces changements sont précédés d'un astérisque.

EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity. Since January 1, 1960, exports of electricity have been reported by the exporting firms through the National Energy Board to the Dominion Bureau of Statistics.

2. Coverage:

a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

c. **Exclusions:** The following commodity movements are excluded from export statistics (some of these commodities are recorded separately as Special Transactions—Non-trade in Tables 3 and 4 of this volume): gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in commodity class 256-99); settler's effects; private donations and gifts; tourist purchases; goods exported to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition and competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ship's stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

3. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

4. **Quantities:** The various units of quantity used in Tables 3 and 4 of this report are listed in "Abbreviations and Units of Quantity", on page 6. Where no unit of quantity is required for statistical purposes a small dash appears in the quantity columns.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the numbers of complete (or substantially complete) units exported, excluding parts. For any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated.

5. **Values:** Export entries define the value of exports as the actual amount received or to be received in terms of Canadian dollars, excluding such charges as freight, insurance, handling, etc. In effect, export values are taken f.o.b. point of consignment for export.

NOTES EXPLICATIVES

1. **Source des données:** La statistique des exportations est tirée des renseignements contenus dans les documents d'exportation sauf dans le cas de l'électricité. Depuis le 1er janvier 1960, les sociétés exportatrices signalent leurs exportations d'électricité au Bureau fédéral de la statistique par l'entremise de l'Office national de l'énergie.

2. Couverture:

a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites au Canada de même que celles qui figuraient autrefois dans la statistique des importations et qui, après avoir subi une nouvelle transformation, sont exportées.

b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises qui figuraient autrefois à la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage et le réemballage ne modifient pas l'état des marchandises en question.

c. **Exclusions:** Les mouvements des marchandises suivantes sont exclus de la statistique des exportations (certaines de ces marchandises sont consignées à part comme Transactions spéciales—hors-commerce dans les tableaux 3 et 4 du présent volume): or et articles en or, lorsque la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale (une petite quantité de déchets d'or sous forme de balayures de bijoutiers est incluse dans la classe 256-99); effets des immigrants; dons et cadeaux privés; achats des touristes; marchandises exportées aux forces armées et aux diplomates canadiens à l'étranger (et les marchandises retournées du Canada par les forces de nos alliés dans l'OTAN ou par les diplomates étrangers); exportations temporaires pour expositions et concours (et films exportés pour exposition ou traitement, ou retournés après exposition ou traitement au Canada); exportations aux alliés du Canada dans l'OTAN financées en vertu des lois des subsides (défense); fournitures d'ensoutage et approvisionnements de navires vendus aux navires étrangers dans les ports canadiens; en général, toutes les exportations temporaires et les marchandises ne faisant que passer par le territoire canadien.

3. **Pays crédités:** Les exportations sont créditées au pays vers lesquels elles sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

4. **Quantités:** Les diverses unités de quantité employées dans les tableaux 3 et 4 du présent rapport sont énumérées dans les "Abréviations et unités de quantité", page 6. Là où l'unité de quantité n'est pas requise pour les besoins de la statistique, un petit tiret s'inscrit dans les colonnes de la quantité.

Les unités de poids ou de volume sont le poids ou le volume des marchandises à l'exclusion de celui de l'emballage nécessité par l'exportation. Les unités de nombre sont le nombre d'unités complètes (ou à peu près) exportées sans les pièces de rechange. Dans toutes les classes où la valeur indiquée comprend des unités complètes et les pièces de ces unités, il est impossible de calculer la valeur moyenne par unité complète.

5. **Valeurs:** Les déclarations d'exportations définissent la valeur d'exportation comme étant la somme effectivement reçue ou devant l'être en dollars canadiens à l'exclusion de frais tels que le transport, les assurances, la manutention, etc. De fait, la valeur d'exportation est la valeur f.a.b. point de consignation pour exportation.

7. Changes in Coverage of Commodity Statistics

Effective January 1, 1960, a new category of export and import transactions was established under the heading of "Special Transactions - Non-trade". These transactions are excluded from the trade totals, but are published for the convenience of users of this information. The commodity classes contained in this category are as follows:

Class	Description	Former treatment	
		Exports	Imports
990-05			
to	Gold and current coin	excluded	excluded
990-65			
995-10	Settlers' effects	included	included
995-12	Private donations and gifts	included	included
995-14	Identifiable tourist purchases	partly included	included
995-81	Goods exported to Canadian diplomatic representatives or Canadian armed forces stationed abroad	excluded	largely included
995-83	Goods exported for exhibition or competition and intended to be returned to Canada	excluded	excluded
995-85	Photographic film moving for exhibition or processing without sale	partly included	partly included
995-89			

Of these classes, settlers' effects and private donations and gifts were included in the total trade prior to 1960. Movements of goods for Canadian armed forces and diplomats abroad were excluded from export totals but movements of goods for foreign armed forces or diplomats in Canada were largely included in import totals. Tourist purchases in Canada were recorded in the appropriate export commodity classes and duty exempt Canadian tourists' purchases abroad were recorded in a separate import class, both types of transactions being included in the trade totals. But while all duty-exempt Canadian tourists' purchases abroad were recorded, the coverage of tourist purchases in Canada was limited to those transactions for which customs export entries are normally required (mail and express shipments only). Photographic film exported or imported without sale was only partly included in the trade totals. Exports and imports of gold and current coin, and temporary movements of goods for exhibition or competition were excluded from the trade totals.

Thus, prior to 1960 the published totals included various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis. Furthermore, some of these transactions did not receive uniform treatment in export and import statistics. The removal of these transactions from export and import totals on a uniform basis has greatly improved balance of trade calculations derived directly from these statistics.

7. Modifications apportées à la couverture statistique des marchandises

A compter du 1er janvier 1960, une nouvelle catégorie de transactions d'exportations et d'importations a été établie sous la rubrique "Transactions spéciales - hors-commerce". Ces transactions sont exclues des totaux du commerce mais sont publiées pour accommoder les intéressés. Les classes de marchandises de cette catégorie sont les suivantes:

Classe	Description	Traitement antérieur	
		Exportations	Importations
990-05			
à	Or et monnaie courante	exclus	exclus
990-65			
995-10	Effets des colons	inclus	inclus
995-12	Dons et cadeaux particuliers	inclus	inclus
995-14	Achats identifiables des touristes	partiellement inclus	inclus
995-81	Marchandises expédiées aux représentants diplomatiques canadiens ou aux forces armées canadiennes à l'étranger	exclus	en grande partie inclus
995-83	Marchandises exportées pour exposition ou concours et devant revenir au Canada	exclus	exclus
995-85	Mouvements de films photographiques en et vue d'expositions ou de développement		
995-89	sans qu'il y ait vente	partiellement inclus	partiellement inclus

Parmi ces classes, les effets des colons et les dons et cadeaux particuliers étaient inclus dans les totaux du commerce, antérieurement à 1960. Les mouvements de marchandises destinées aux forces armées et aux diplomates canadiens à l'étranger étaient exclus des exportations, mais ceux des marchandises destinées aux forces armées et aux diplomates étrangers au Canada étaient en grande partie inclus dans les totaux des importations. Les achats des touristes au Canada s'inscrivaient dans les classes appropriées de marchandises exportées et les achats en franchise s'inscrivaient dans une classe d'importation distincte, les deux formes de transactions étant incluses dans les totaux du commerce. Mais alors que tous les achats en franchise des Canadiens à l'étranger étaient inscrits, la couverture des achats des touristes au Canada se limitait aux transactions exigeant normalement des inscriptions des ports douaniers (expéditions par la poste et les messageries seulement). Les films photographiques exportés ou importés sans être vendus, n'étaient inclus qu'en partie dans les totaux du commerce. Les exportations et les importations d'or et de monnaie courante et les mouvements temporaires de marchandises destinées aux expositions ou concours étaient exclus des totaux du commerce.

Ainsi, jusqu'à 1960, les totaux publiés comprenaient divers mouvements de marchandises qui n'ont aucune implication internationale ou qu'il vaut mieux, pour diverses raisons, isoler du commerce des marchandises pour l'analyse économique. De plus, la statistique des exportations et des importations n'a pas traité uniformément certaines de ces transactions dont la disparition des chiffres des exportations et des importations d'après une base uniforme, a sensiblement amélioré les calculs de la balance des échanges tirés directement de cette statistique.

COUNTRY CLASSIFICATION USED IN EXTERNAL TRADE STATISTICS

Effective January 1, 1960, a new country classification was introduced for export and import statistics. This classification groups countries within the following nine geographic regions:

Western Europe
Eastern Europe
Middle East
Other Africa
Other Asia
Oceania
South America
Central America and Antilles
North America

The order in which the various regions are arranged was determined by the convenience of listing the United Kingdom first, when presenting statistics of commodities by countries, and the United States last, directly above the commodity totals. This arrangement is traditional in Canadian trade statistics, and has proven most useful in permitting ready reference to details of trade with Canada's two leading trading partners.

Within each region the countries are listed in alphabetical order in two sub-groups, the first for Commonwealth countries and other countries entitled to preferential rates of duty, and, the second for other countries. For any country the area included coincides with the geographical area of the country unless otherwise stated; that is the area includes both the customs area of the country and also any free areas in which customs control may not be exercised. Countries with which Canada's trade is small are grouped with contiguous or related areas.

Revisions to the country classification, effective January 1, 1961 and January 1, 1962, are indicated by an asterisk to the left of the country code.

CLASSIFICATION DES PAYS POUR LA STATISTIQUE DU COMMERCE EXTÉRIEUR

A compter du 1er janvier 1960, la statistique des exportations et des importations comprend une nouvelle classification qui groupe les pays dans les neuf régions géographiques suivantes:

Europe occidentale
Europe orientale
Moyen-Orient
Autres pays d'Afrique
Autres pays d'Asie
Océanie
Amérique du Sud
Amérique centrale et Antilles
Amérique du Nord

L'ordre dans lequel les diverses régions sont énumérées a été établi de façon à indiquer d'abord le Royaume-Uni dans la présentation de la statistique des marchandises selon les pays, et les États-Unis en dernier, directement au-dessus des totaux de marchandises. Cette disposition est traditionnelle dans la statistique du commerce canadien et s'est révélée très utile en ce qu'elle permet de se référer rapidement aux données du commerce du Canada avec ses deux principaux partenaires commerciaux.

Au sein de chaque région, les pays sont groupés en deux sous-groupes: le premier, pour les pays du Commonwealth et les autres pays bénéficiant du tarif préférentiel, et le second, pour les autres pays. A moins d'indication contraire, l'étendue d'un pays coïncide avec son étendue géographique, c'est-à-dire qu'il comprend la région douanière et aussi toutes régions libres où le contrôle douanier n'est peut-être pas exercé. Les pays avec lesquels le commerce du Canada n'est pas considérable sont groupés avec les régions contiguës ou connexes.

Les révisions apportées à la classification des pays est entrée en vigueur le 1er janvier 1961 et le 1er janvier 1962, sont indiquées par un astérisque à la gauche du code du pays.

NEW EXPORT COMMODITY CLASSIFICATION

Effective January 1, 1961, a new Export Commodity Classification was introduced. This new classification is based on the Standard Commodity Classification which was developed in the Dominion Bureau of Statistics as a tool for integrating statistical series derived from different sources.

The new Export Commodity Classification differs greatly from the former Statistical Classification—Exports. The old classification classified commodities primarily according to the material of which they were chiefly composed (component material); the new classification groups commodities primarily according to stage of processing and purpose. It is divided into seven sections, as follows:

Section	Title	Classes
I	Live Animals	1-19 to 9-99
II	Food, Feed, Beverages and Tobacco	11-09 " 183-99
III	Crude Materials, Inedible	201-10 " 291-99
IV	Fabricated Materials, Inedible	300-12 " 490-99
V	End Products, Inedible	500-19 " 960-99
VI	Special Transactions—Trade	970-10 " 970-75
VII	Special Transactions—Non-trade ..	990-05 " 995-89

Section I contains all live animals except live fish and other sea foods shipped for food, which are included in Section II.

Section II contains all commodities whose chief end use is as food, feed, beverages and tobacco. Within this section, the commodities are further classified by component material and stage of processing.

Section III contains all commodities whose chief use is as materials for industry, and which have not been processed beyond the stage of cleaning, sorting or concentrating. Within this section, the commodities are further classified chiefly by component material.

Section IV contains all commodities which have passed the preliminary stages of processing but which are still used chiefly as materials in some later industrial process. All commodities included in this section will be processed further before reaching the form in which their end use is served. Within this section, the commodities are further classified chiefly by component material.

Section V contains all commodities which will not lose their identity through further processing and which are commonly regarded as articles rather than as materials, together with finished identifiable parts, attachments and accessories of these commodities. Within this section, the commodities are further classified chiefly by principal use or function.

Section VI contains special transactions, essentially commercial in nature, which are not classified by commodity in trade statistics. The value of these transactions is included in export totals.

Section VII is described fully in "Changes in Coverage of Commodity Statistics", on page 7.

The introduction of the new Export Commodity Classification, made it difficult to compare commodity totals for 1961 with those for earlier years. Even where the content of a 1961 commodity class was the same as that of a 1960 class there were differences in codes and often in descriptions which

NOUVELLE CLASSIFICATION DES PRODUITS D'EXPORTATION

A compter du 1er janvier 1961, une nouvelle classification des marchandises d'exportation a été établie. Cette nouvelle classification se fonde sur la classification type des marchandises, qui fut mise au point par le Bureau fédéral de la statistique comme instrument à utiliser pour intégrer la série statistique obtenue de différentes sources.

La nouvelle classification des produits ou marchandises d'exportation diffère grandement de l'ancienne, qui classait les produits essentiellement selon la matière principale dont ils se composaient (l'élément principal); au contraire, la nouvelle, groupe les produits essentiellement selon le degré de transformation et selon l'usage. Elle se divise en sept sections:

Section	Titre	Catégories
I	Animaux vivants	1-19 à 9-99
II	Aliments, provendes, boissons et tabacs	11-09 " 183-99
III	Matières brutes, non comestibles	201-10 " 291-99
IV	Matières travaillées, non comestibles....	300-12 " 490-99
V	Produits finis, non comestibles	500-19 " 960-99
VI	Transactions spéciales—commerciales	970-10 " 970-75
VII	Transactions spéciales—hors-commerce	990-05 " 995-89

Section I englobe tous les animaux vivants, sauf les poissons vivants et autres fruits de mer expédiés comme aliments, lesquels sont compris dans la Section II.

Section II englobe tous les produits qui sont utilisés essentiellement comme aliments, provendes, boissons et tabac. Dans cette section, les produits sont classés selon l'élément principal et le degré de transformation d'une manière plus détaillée.

Section III englobe tous les produits qui sont utilisés essentiellement comme matières pour l'industrie et dont le degré de transformation n'a pas dépassé le stade du nettoyage, du triage et de la concentration. Dans cette section, les produits sont classés davantage selon l'élément principal surtout.

Section IV englobe tous les produits qui ont passé par les étapes préliminaires de la transformation, mais qui seront encore utilisés principalement comme matières dans quelque procédé industriel ultérieur. Tous les produits compris dans cette section seront transformés davantage avant d'atteindre la forme qui leur permettra de remplir leur usage ultime. Dans cette section, les produits sont classés davantage selon l'élément principal surtout.

Section V englobe tous les produits qui ne perdent pas leur identité par une transformation supplémentaire et qui sont tenus ordinairement pour des articles plutôt que pour des matières, ainsi que les pièces ouvrées identifiables et les accessoires de ces produits. Dans cette section, les produits sont classés davantage selon l'usage ou la fonction principale surtout.

Section VI englobe les transactions spéciales, de caractère essentiellement commercial, qui ne sont pas classées selon le produit dans la statistique du commerce. La valeur de ces transactions est comprise dans le total des exportations.

Section VII est expliquée au complet dans les "Modifications apportées à la couverture statistique des marchandises", page 7.

L'établissement d'une nouvelle classification des produits d'exportation ne permet pas facilement de comparer le total des marchandises de 1961 avec celui des années antérieures. Même dans les cas où la composition d'une catégorie de produits de 1961 était identique à celle d'une catégorie de 1960, il existait

tended to obscure comparisons. To assist users in overcoming comparison problems, the pages in this report present a complete convertibility key which was used in preparing this annual volume.

The convertibility key between 1961 statistics and those for earlier years is based on a thorough study of export entries received during the months of August, 1959, and April, 1960, which were coded to both the old and the new classifications and cross-tabulated, together with additional studies of the content of the large "n.o.p." classes of the old classification in 1959 and 1960, and studies of the content of several of the "n.e.s." classes of the new classification in 1961. The key as presented on the following pages provides a basis for obtaining the 1960 equivalent of 1961 totals where such equivalents are readily available.

The convertibility key presented here differs from the information contained in the Export Commodity Classification. The Classification showed, for each 1961 class, the 1960 classes in which the content of the 1961 class had previously been coded. In many cases this resulted in showing against 1961 classes the codes of 1960 classes which accounted for a negligible proportion of the 1961 totals. Such a detailed presentation was necessary for the guidance of the staff engaged in preparing export statistics; for analytical use it was often of little value. The key presented in this report omits details believed to be of minor significance.

The convertibility key shows all comparisons believed to be valid between statistics for 1961 and those of 1960. In some cases the comparison is a simple one: one 1961 class is compared with one 1960 class. In other cases it is complex: one 1961 class may be compared with a sum of 1960 classes, or a sum of 1961 classes with one 1960 class, or a sum of 1961 classes with a sum of 1960 classes. There are likewise two levels of validity: some comparisons are believed to be fully accurate, others nearly accurate (usually about 90% or better). The level of validity of each comparison is indicated in the "notes" column of the key, and footnotes indicate the procedure for making comparisons involving the sum of 1961 classes and also the limitations of nearly accurate comparisons whenever these are less than 90% valid.

There is one major reservation about the use of this key: all comparisons are based on analysis conducted at the class total level, not on the class-by-country level. Persons interested primarily in trade with specific partner countries should bear in mind that individual country comparisons may be distorted by special factors not accounted for in the convertibility key.

The following tables show the number of 1961 commodity classes, and the value of trade in 1961, for which comparisons of different types may be made.

des différences de codification et de description qui avaient tendance à rendre les comparaisons obscures. En vue d'aider les usagers à résoudre les problèmes de comparaison, les pages du présent rapport donnent une clef complète de convertissement qui fut utilisée lors de la rédaction du présent volume annuel.

La clef de convertissement pour la comparaison entre la statistique de 1961 et celle des années antérieures se fonde sur une étude minutieuse des déclarations d'exportations reçues durant les mois d'août 1959 et d'avril 1960, qui ont été codifiées en fonction de l'ancienne comme de la nouvelle classification et totalisées par recouplement; elle se fonde en outre sur des études supplémentaires de la composition des grandes catégories "n.d.a." de l'ancienne classification en 1959 et 1960, ainsi que sur des études de plusieurs des catégories "n.d.a." de la nouvelle classification en 1961. La clef, présentée dans les pages ci-après, fournit une base qui permet d'obtenir l'équivalent de 1960 du total de 1961, dans les cas où un tel équivalent est aisément trouvable.

La clé de convertissement présentée ici diffère des renseignements contenus dans la Classification des marchandises d'exportation. Celle-ci indiquait à l'égard de chaque catégorie de 1961 les catégories de 1960, dans lesquelles la composition de la catégorie de 1961 avait antérieurement été codifiée, de sorte que dans plusieurs cas les chiffres des catégories de 1960 qui comptaient pour une proportion négligeable du total de 1961 ont pu figurer sur une base comparable avec les catégories de 1961. Une présentation ainsi détaillée était nécessaire pour la gouverne du personnel qui s'occupe de la rédaction des rapports statistiques de l'exportation. Au point de vue analytique, elle était souvent de peu de valeur. La clef présentée dans le présent rapport omet les détails jugés peu importants.

La clef montre toutes les comparaisons tenues pour valables entre la statistique de 1961 et celle de 1960. Dans certains cas, la comparaison est simple: telle catégorie de 1961 est comparée avec telle catégorie de 1960. Dans d'autres cas, elle est complexe: une catégorie de 1961 peut se comparer avec un total de catégories de 1960, ou un total de catégories de 1961 avec une catégorie de 1960, ou encore un total de catégories de 1961 avec un total de catégories de 1960. Il y a de même deux niveaux de validité: certaines comparaisons sont tenues pour entièrement exactes, d'autres pour à peu près exactes (d'ordinaire, environ 90 p. 100 exactes ou plus). Le niveau de validité de chaque comparaison est indiqué dans la colonne des "remarques" de la clef, et les notes en bas de page indiquent le procédé à suivre pour établir des comparaisons comportant le total des catégories de 1961 et aussi les limites des comparaisons presque exactes chaque fois que celles-ci sont moins de 90 p. 100 valables.

Il n'y a qu'une réserve principale au sujet de l'usage de cette clef: toutes les comparaisons sont fondées sur l'analyse faite au niveau total de la catégorie, non au niveau de la catégorie selon le pays. Les personnes qui s'intéressent principalement au commerce avec certains pays en particulier doivent tenir compte du fait que des comparaisons à l'égard de pays distincts peuvent être déformées par des facteurs spéciaux non compris dans la clef de convertissement.

Les tableaux ci-après donnent le nombre de catégories des marchandises de 1961 et la valeur du commerce de 1961, à l'égard duquel on peut établir des comparaisons entre les différents genres.

The tables illustrate clearly that, notwithstanding the change in classification, comparisons between statistics for 1961 and 1960 are possible for most of Canada's export trade. For 53% of the classes of the new classification a simple comparison can be made with 1960 statistics, and these classes accounted for 81% of the value of export trade in 1961. Complex comparisons can be made for an additional 32% of the classes accounting for a further 16% of the value of exports. For only 15% of the classes of the new classification are comparisons impossible, and these accounted for little more than 3% of the value of export trade in 1961.

Les tableaux montrent clairement qu'il est possible, malgré le changement de classification, de comparer la statistique de 1961 avec celle de 1960, en ce qui concerne la majeure partie du commerce d'exportation du Canada. Ainsi, on peut établir une comparaison simple entre la statistique de 1961 et celle de 1960 en ce qui concerne 53 p. 100 des catégories comprises dans la nouvelle classification. A noter, que ces catégories comptaient pour 81 p. 100 de la valeur du commerce d'exportation en 1961. D'autre part, on peut établir des comparaisons complexes à l'égard de 32 p. 100 des catégories; celles-ci ont compté pour 16 p. 100 de la valeur des exportations. Il est impossible d'établir des comparaisons à l'égard de 15 p. 100 seulement des catégories de la nouvelle classification, et celles-ci ont répondu pour à peine plus de 3 p. 100 de la valeur du commerce d'exportation en 1961.

The tables also reveal the greater emphasis placed on end products and fabricated materials in the Export Commodity Classification than in the old classification. For end products only 35% of the classes accounting for 45% of the value of these exports are suitable for simple comparisons, while 40% of the classes accounting for 39% of the value of these exports require complex comparisons, and no comparisons are possible for 25% of the classes covering the remaining 16% of the value of exports of end products. For fabricated materials the pattern is less extreme; simple comparisons are possible for 49% of the classes and 76% of the value, complex comparisons for 32% of the classes and 21% of the value, and no comparisons can be made for 19% of the classes accounting for 3% of the value. In other sections comparisons are possible for almost all classes and at least 99% of the value of exports.

Les tableaux révèlent également qu'on a insisté davantage sur les produits finis et les matières fabriquées dans la classification des marchandises d'exportation que dans l'ancienne classification. Pour ce qui est des produits finis, 35 p. 100 seulement des catégories (comptables pour 45 p. 100 de la valeur des exportations) se prêtent à l'établissement de simples comparaisons, tandis 40 p. 100 des catégories (comptables pour 39 p. 100 de la valeur des exportations) appellent des comparaisons complexes; par ailleurs, il n'est pas possible d'établir des comparaisons à l'égard de 25 p. 100 des catégories, comptables pour les autres 16 p. 100 de la valeur des exportations des produits finis. En ce qui concerne les matières fabriquées, le processus est moins extrême. Il est possible d'établir de simples comparaisons à l'égard de 49 p. 100 des catégories et de 76 p. 100 de la valeur, des comparaisons complexes à l'égard de 32 p. 100 des catégories et de 21 p. 100 de la valeur, mais on ne peut pas en faire à l'égard de 19 p. 100 des catégories, comptables pour 3 p. 100 de la valeur. Dans d'autres sections, il est possible d'établir des comparaisons à l'égard de presque toutes les catégories et à l'égard d'au moins 99 p. 100 de la valeur des exportations.

CONVERTIBILITY KEY

Showing 1960 Classification Equivalents For 1961-62 Classes

NOTES:

- (i) Column 1, "1961-62 Classes", shows the class code under which the figures referred to are presented in the 1960-62 annual volume. The key lists all classes in 1961-62 numeric order.
- (ii) Column 2, "1960 Equivalent", shows the class code or codes under which the figures referred to were presented in 1960 reports. In a few cases a percentage follows the 1960 class code; this indicates that only the specified proportion of the 1960 class is included against the relevant 1961-62 code.
- (iii) Column 3, "Notes", contains an alphabetic code indicating the type of comparison and a numeric footnote reference if required. The meaning of the alphabetic code is as follows:
- a: 1961-62 and 1960 statistics are fully comparable within the limits of any qualifications set forth in footnotes.
 - b: 1961-62 and 1960 statistics are nearly comparable (coverage about 90% the same) within the limits of any qualifications set forth in footnotes.
 - c: 1961-62 class has no equivalent in 1960 figures. All such references are footnoted.
 - d: A non-existent or "dummy" class for which no 1961-62 data are compiled, but which contains all or part of one or more 1960 classes. All such references are footnoted.
- (iv) An asterisk in column 1 means that other 1961-62 classes must be added to the specified class to obtain the equivalent of the totals shown for 1960. An asterisk in Column 2 means that the 1961-62 class in question is part of a complex comparison although no 1960 codes are shown. All such cases are footnoted.

CLEF DE CONVERTISSEMENT

Montrant les équivalents de la classification de 1960 pour les classes de 1961-1962

NOTES:

- (i) Colonne 1, "Classes de 1961-1962" montre l'indicatif de la classe à laquelle appartiennent les chiffres du volume annuel 1961-1962. Le code énumère toutes les classes de 1961-1962 dans l'ordre numérique.
- (ii) Colonne 2, "Équivalent de 1960", montre l'indicatif ou les indicatifs de la classe à laquelle appartiennent les chiffres des rapports de 1960. Dans de rares cas, le pourcentage correspond à l'indicatif de la classe de 1960; ceci indique que seule la proportion spécifiée de la classe de 1960 est incluse en correspondance avec l'indicatif de 1961-1962.
- (iii) Colonne 3, "Notes", contient l'indicatif alphabétique indiquant le type de comparaison et un renvoi numérique s'il y a lieu. Voici la signification de l'indicatif alphabétique:
- a: Les statistiques de 1961-1962 et de 1960 sont exactement comparables dans les limites de toutes réserves introduites dans les renvois.
 - b: Les statistiques de 1961-1962 et de 1960 sont presque comparables (soit pour environ 90 p. 100) dans les limites de toutes réserves introduites dans les renvois.
 - c: La classe de 1961-1962 ne possède pas d'équivalent dans les chiffres de 1960. Tous les rapports de cette nature sont inscrits dans les renvois.
 - d: Une classe non existante ou "fictive" pour laquelle aucune statistique n'a été calculée en 1961-1962 mais qui contient toutes ou une partie d'une ou plusieurs des classes de 1960. Tous les rapports de cette nature sont inscrits dans les renvois.
- (iv) Un astérisque à la colonne 1 signifie que d'autres classes de 1961-1962 doivent être ajoutées à la classe spécifiée pour obtenir l'équivalent des totaux indiqués pour 1960. Un astérisque à la colonne 2 signifie que la classe de 1961-1962 désignée fait partie d'une comparaison complexe, bien qu'aucun indicatif de 1960 ne soit donné. Tous les rapports de cette nature sont inscrits dans les renvois.

42 - 1960 values for classes 205-49 and 242-39 are included with class 243-49.

49 - Dummy class 299-40 covers the content of 1961-62 class 239-99 and part of 1961-62 classes 213-99, 291-99, 334-99 and 339-99.

50 - 1960 value for class 291-19 is included with classes 242-99, 244-99 and 246-99.

51 - 1961-62 class 244-99 includes only about 80%-85% of the value which would have been recorded in 1961-62 for 1960 class 3020. The balance of 1960 class 3020 is included in 1961-62 class 291-19.

52 - 1960 value for class 252-29 is included with dummy classes 299-60, 299-80 and 499-80.

53 - 1960 value for class 253-20 is included with class 253-30.

54 - 1960 values for classes 253-90 and 255-40 are included with class 259-99.

55 - 1960 class 6310 included both platinum contained in ores and platinum as refined metal. The platinum included in domestic exports was chiefly in the form of ores and concentrates which are now included in class 256-29. The platinum included in re-exports was chiefly in the form of refined metal which is now included in class 455-29. Thus class 6310 is compared with 256-29 in tables of domestic exports (actually the comparison is with the sum of 256-29 and 455-29), but with 455-29 in tables of re-exports.

56 - Dummy class 299-60 covers the content of 1961-62 classes 256-39 and 259-65, and part of 1961-62 classes 252-29 and 259-98.

57 - 1960 value for class 259-20 is included with class 459-25.

58 - 1960 value for class 259-98 is included with dummy classes 299-60 and 499-60.

59 - 1960 value for class 261-89 is included with class 261-69.

60 - Dummy class 499-70 covers the content of 1961-62 classes 264-99, 272-49, 439-41, 439-99, 473-99, 476-59, 476-99, 479-89, 479-99, 960-92 and 960-94, and part of 1961-62 classes 389-99, 414-19, 428-99, 436-49 and 700-79.

42 - Les valeurs des classes 205-49 et 242-39 en 1960 sont incluses dans la classe 243-49.

49 - La classe fictive 299-40 contient la classe 239-99 de 1961-1962 et une partie des classes 213-99, 291-99, 334-99 et 339-99 de 1961-1962.

50 - La valeur de la classe 291-19 en 1960 est incluse dans les classes 242-99, 244-99 et 246-99.

51 - La classe 244-99 de 1961 contient seulement environ 80 à 85 p. 100 de la valeur qui aurait dû être enregistrée en 1961-1962 pour la classe 3020 de 1960. Le reste de la classe 3020 de 1960 est inclus dans la classe 291-19 de 1961-1962.

52 - La valeur de la classe 252-29 en 1960 est incluse dans les classes fictives 299-60, 299-80 et 499-80.

53 - La valeur de la classe 253-20 en 1960 est incluse dans la classe 253-30.

55 - La classe 6310 de 1960 comprend le platine contenu dans le minerai et le platine affiné. Le platine inclus dans les exportations nationales était surtout sous forme de minerai et de concentrés non inclus dans la classe 256-29. Le platine inclus dans les réexportations était surtout sous forme de métal affiné maintenant inclus dans la classe 455-29. Ainsi, la classe 6310 est comparée à la classe 256-29 dans les tableaux des exportations nationales (en réalité la comparaison est en rapport avec la somme de 256-29 et 455-29), mais à la classe 455-29 dans les tableaux des réexportations.

56 - La classe fictive 299-60 contient les classes 256-39 et 259-65 de 1961-1962 et une partie des classes 252-29 et 259-98 de 1961-1962.

55 - 1960 class 6310 included both platinum contained in ores and platinum as refined metal. The platinum included in domestic exports was chiefly in the form of ores and concentrates which are now included in class 256-29. The platinum included in re-exports was chiefly in the form of refined metal which is now included in class 455-29. Thus class 6310 is compared with 256-29 in tables of domestic exports (actually the comparison is with the sum of 256-29 and 455-29), but with 455-29 in tables of re-exports.

57 - 1960 value for class 259-20 is included with class 459-25.

109 - Dummy class 443-60 is almost equivalent to the sum of 1961-62 classes 443-29 and 443-59.

110 - Dummy class 444-98 is almost equivalent to the sum of 1961-62 classes 444-30 and 444-99.

111 - 1960 value for class 449-20 is included with class 449-59.

112 - 1960 value for class 451-49 includes most of the 1960 value for class 451-29 and about half of the 1960 value for class 469-65.

113 - 1961-62 class 451-32 includes only about 80%-85% of the value which would have been recorded in 1961-62 for 1960 class 6027. The balance of 1960 class 6027 is included in 1961-62 class 451-49 and dummy class 499-50.

114 - Dummy classes 452-13 and 452-14 are equivalent to the sum of 1961-62 classes 452-04, 452-08 and 452-12.

115 - 1960 value for class 452-85 is included with class 452-99, but 1960 classes 6095, 6110 and 6210 would have included only about 80%-85% of the value actually recorded for the two 1961-62 classes. The balance of the 1961-62 classes is derived from 1960 class 6680, which is included in dummy class 499-60.

116 - 1960 value for class 453-09 is included with class 453-49.

117 - 1960 value for class 454-15 is included with class 454-99.

118 - Dummy class 499-60 covers the content of 1961-62 classes 455-99, 459-79, 459-99 and 779-19 and part of 1961-62 classes 259-98, 339-99, 405-99, 452-85, 452-99, 490-70 and 950-99.

55 - La classe 6310 de 1960 comprend le platine contenu dans le minerai et le platine affiné. Le platine compris dans les exportations était surtout sous forme de minerai et de concentrés maintenant compris dans la classe 256-29. Le platine compris dans les réexportations était surtout sous forme de métal affiné maintenant compris dans la classe 455-29. Ainsi, la classe 6310 se compare à 256-29 dans les tableaux des exportations nationales (en réalité la comparaison est en rapport avec la somme de 256-29 et 455-29), mais avec 455-29 dans les tableaux de réexportations.

57 - La valeur de la classe 259-20 en 1960 est incluse dans la classe 459-25.

114 - Les classes fictives 452-13 et 452-14 équivalent à la somme des classes 452-04, 452-08 et 452-12 de 1961-1962.

115 - La valeur de la classe 452-85 de 1960 est incluse dans la classe 452-99, mais les classes 6095, 6110 et 6210 de 1960 n'auraient inclus qu'environ 80 à 85 p. 100 de la valeur réelle enregistrée pour les deux classes en 1961-1962.
